

HOW TO EMBED OPEN STREET MAP ON YOUR QRZ BIO PAGE

I added a map of my contacts to my QRZ Page using this source code. You would replace n9ms with your own call sign.

```
<p><iframe frameborder="0" height="600" scrolling="no"
src="https://www.qsomap.com/qsomapprodution/qrzosmapi.php?call=n9ms&iconcolor=mode" width="1024"></iframe></p>
```

This is the code for the 2nd map on my QRZ page that shows polylines. I'm specifying From/To Dates: 2025-01-01 thru 2025-01-30, my lat/lon 35.253836,-77.959992 turns on the polylines.

```
<p><iframe frameborder="0" height="600" scrolling="no"
src="https://www.qsomap.com/qsomapprodution/qrzosmapi.php?call=n9ms&iconcolor=band&from=2025-01-01&to=2025-01-30&latlon=35.253836,-77.959992" width="1024"></iframe></p>
```

I will be updating this page as I add more parameters.
