

QSO Forwarding Ham Radio Deluxe

In Ham Radio Deluxe, go to Tools → Configure → QSO Forwarding. You will see a screen similar to the one below. Check the UDP Send box, fill in the Send Address as “QSOMAP.COM”, and fill in the port as “12070” then Press the “OK” button at the bottom of the screen. In my case, I had to then close HRD Logbook and re-open it for the forwarding to begin.

QSO Forwarding

Share new QSOs with another logging program

UDP Send

Forward logbook changes using UDP to other logging programs

Send Address:

Send Port: Note: N1MM port is 12060
Do NOT enable send and receive on the SAME port!

UDP Receive

Fill in missing fields on Receive

Lookup missing fields on Receive

Receive logbook changes using UDP from other logging programs (TR4W, N1MM)

Receive Port: Target Database:

MyStation fields should be:

Receive QSO notifications using UDP from other applications (WSJT-X)

Receive Port: Target Database:

MyStation fields should be:

Select this option to forward new logbook entries to 3rd party programs using the UDP protocol. Only select it if the other logbook program you are using supports this option. The record is sent using multibyte (non-UNICODE) text. The new logbook entry is sent in N1MM XML format. An example of a record is:

```
<?xml version="1.0"?>
<contactinfo>
  <contestname>CQWVSSB</contestname>
  <contestnr>71</contestnr>
  <timestamp>2008-07-08 10:00:00</timestamp>
```
